

How to Avoid a Costly Clog!

Only Flush Toilet Paper!

Do NOT Flush:

Disposable wipes, feminine hygiene products, medications, syringes, cotton swabs, paper towels, band-aids, cat litter, diapers

Only Drain Water!

Do NOT Drain:

Cooking oil, pan drippings, gravy, lard, bacon grease, shortening, sauces, dressings, mayonnaise, creams

Only certain materials are made to go down the drain. Putting non-drainable materials in the pipes can cause a clog, not just in your line, but also in the main sewer line in the street. This can cause the sewer to back up into your house. By putting the proper materials down the drain, we can avoid expensive plumbing problems, protect public health, and keep our water clean.

Please alert the Township if you have a sewer back up at 484-875-6020.
